FOREWARD

The Carers' Support Centres' Strategy 2022 to 2027 sets out our values and priorities for the next five years and recognises the vitally important service that Carers provide. It affirms our commitment and determination to support Carers in their caring role and their health and wellbeing.

This strategy has been developed in consultation with a wide range of individuals and professionals, Carers, staff and volunteers, working with a wide range of partners enhancing the support for Carers of all ages.

Carers are daughters, sons, partners, parents, grandparents, children, friends or neighbours doing what needs to be done to maintain a quality of life for those they are looking after. They may not see themselves as Carers, instead seeing caring as an extension of their relationship, doing what families and friends do. It is crucially important that Carers are identified at the earliest opportunity to ensure they are recognised, respected and supported as partners in care.

We will focus on doing everything we can to enable Carers to live well. To enable Carers to come forward we must ensure that everyone knows who a Carer is and their value in society.

This strategy shows how we intend to meet the challenges Carers face. With a clear vision and defined aims we will work with our partners to achieve greater support for Carers.

We will strive to deliver excellence in everything we do. We will be open and we will listen, we will raise awareness and we will value, enable and empower Carers to make decisions that are right for them.
